JOURNAL

A land yacht full of style, luxury and sophisticated technology!

3/2011

This journal informs about important topics, innovations and events about:

ACTION MOBIL
BUILT IN AUSTRIA
DRIVEN IN THE WORLD!

GLOBAL CRUISER
OF THE TOP CATEGORY!

...more strongly than any other models, the "ATACAMA L/Function" embodies the ideal for world tours and adventure.

ACTION MOBIL
Lifting- and loading
system for heavy
loads

Dust-free storage
space

Easy loading
Safe transport
Simple handling

"BIG CHARLY" can transport lots of things in off-road terrain: be it 4x4, 2 motorbikes, 2 quads, ultralight, snowmobile and other equipment. After a slight modification, even a horse could be transported in its box. On top of all that, the living area offers any luxury and convenience you may wish for.

ACTION MOBIL has the optimal solution for any type of project. Therefore this high-end solution for loading a genuine 4x4 has been developed and implemented. The entire loading and unloading procedure can be handled either manually or automatically via a remote control.

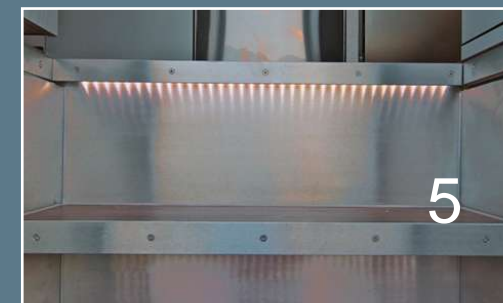

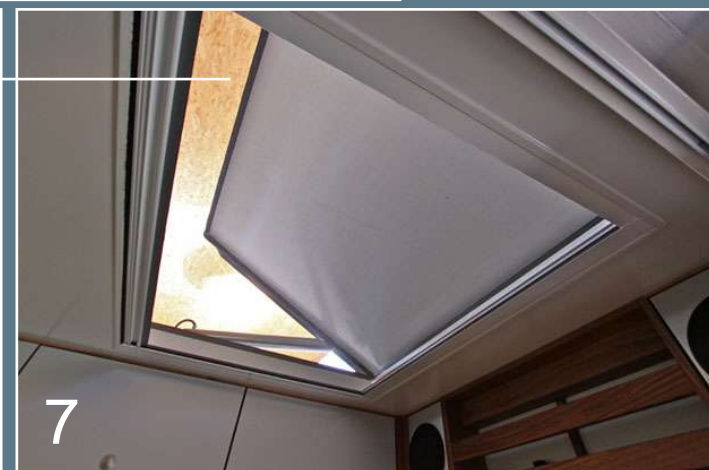

Quality Management ensures continuous improvement of our services and hence customer satisfaction.

ACTION MOBI "ATACAMA L/FUNCTION" In the ATACAMA, the most varied solutions have been carried out perfectly and with an eye on functionality.

...the lifting- and loading system for heavy loads at the rear of the cabin (1), the extendable ladder and the emergency equipment (spade, axe ...) for off-road incidents at the side door leading to the garage (2), additional fuel containers and a tool cupboard (3), a clever aid for boarding the cabin (4), LED-lit steps leading to the cabin (5), the sturdy awning, as used for houses, with LED lighting (6), or the popular ACTION MOBIL exit flap above the bed, now also available with electric drive (7), just to name a few.

...FUNCTIONALITY and PERFECTION as is usual with ACTION MOBIL

***Sophisticated ambience in the land yacht.
Full range of functions for a lengthy stay
in the ACTION MOBIL.***

When planning furniture, every inch of space is used and designed sensibly. Just one example are the remote controls that have found a secure place here.

The Nespresso coffee machine and the cups that go with it are mounted on a drawer and after use they can be sent back into the cupboard with one flick of the wrist.

The kitchen working area is separated from the sitting bench by a splash guard made of hard glass.

The kitchen block provides induction cooker, oven, dishwasher, pull-out freezer, ACTION MOBIL fridge, washing machine and draw-out baskets for waste disposal, as well as space for cleaning kit.

At the touch of a button, the bed, which is normally retracted to save space, can be converted into a spacious lounge. Thus the entire length of the vehicle is kept compact, generating space for bulky objects in the rear garage.

The intelligent layout in the ATACAMA model. A glass door can be fixed in two positions. If desired, the sanitary area can be enlarged by the centre corridor and thus allows for a dressing area. In addition, the shower is separated from the rest by a glass door. Sophisticated details give proof of the ACTION MOBIL designers' wealth of ideas. The bottom photo shows the big passage door to the cabin; of course the window can be closed by a blind to shield the interior from view. ▽

▲ Television in HD quality - just like at home. To save space, the screen is mounted flush with the ceiling.
