

ATACAMA- family

.... a grey mouse?
on the contrary, a high-tech
truck!

Grey, because in the evening twilight and in the night the contours of the vehicle are to meld unobtrusively with the surrounding countryside.

high-tech: ACTION MOBIL has thought of something special regarding the lifting device for the Enduro at the rear of the cabin: The Enduro is being used in off-road terrain and the ACTION MOBIL takes it there. For this purpose an optimized angle of departure at the rear of the vehicle is one of the most important prerequisites. It means that the transporting device at the rear must not impair the angle of departure. The solution to the problem is a hydraulically operated construction made of special steel. An added benefit is that the mounting height of the motorcycle makes it difficult for thieves to get hold of it. Yet another innovative solution by ACTION MOBIL.

family: The double cabin of the MAN driver's cab is by far the safest and most comfortable solution for transporting people on long-distance trips. Its 4 doors facilitate boarding and leaving the vehicle and, naturally, loading is also made easier. It goes without saying that there is a direct passage between the driver's cab and the ACTION MOBIL cabin.

Your family will thank you for it!

OF THE TOP CATEGORY!

ATACAMA L-family

Living in a villa on wheels – one day here, the next day somewhere else. Always parked in places with the most gorgeous view of the landscape and preferably without neighbours. Often such marvellous sites cannot be reached but with the help of a four-wheel drive. Wherever you may be, the ACTION MOBIL amenities such as spacious sanitary area, comfortable kitchen, oven, freezer, coffee machine, TV and many others will always be at your disposal. Even after tiring driving days you will be able to enjoy a restful close of the day, thus making it a unique experience.

The photo shows the view from the bedroom area facing the front. In front of the permanent double bed we have placed the comfortable sofa. Within seconds the electrically operated table can be lowered, making space for another large bed. Right at the front you see the sanitary area. In the photo the door to the shower is open. Behind the door, on the left you find a toilet and washroom. In the same photo you also see the closable passage leading to the driver's cab.

ATACAMA L-family

Easy-care furniture tops in light colours provide the interior with an accommodating, sunny atmosphere. The furniture doors conceal sophisticated gadgets, such as a swing-out coffee machine, a roll-out TV screen, wine glasses fixed in place to make them off-road proof, and many others. Have a look at the functional kitchen with its worktop made of stainless steel, its electric induction field, the stainless steel oven and the genuine ACTION MOBIL fridge with its functional roll-out baskets. They keep your fridge tidy and, on top of that, bottles can be stored upright. Automatic air conditioning of the cabin is a matter of course.

The sanitary area

gets a lot of attention in the ACTION MOBIL vehicles. The model ATACAMA provides a sophisticated solution which takes up a minimum of space. The door can be fixed in two positions, thus creating separate functional areas. Above the ceramic toilet, a folding down washbasin, specially designed by ACTION MOBIL, is mounted. The toilet is equipped with an additional hygiene shower. Everything you need is in place for travelling in countries with low hygienic standards, and there is one more thing not to be forgotten: What can be more enjoyable than taking a shower after some sports activities on your Enduro? ***This is what the pleasure of travelling is all about.***

NEWS!

In the past year of 2009 the ACTION MOBIL family has again grown considerably. The Management would like to thank you for the trust you place in us.

The year 2010 is to become a milestone in the history of ACTION MOBIL. 30 years of innovative development work will be crowned with the erection of a new manufacturing hall.
